

goCAD.OSL

Il Software di preventivazione intelligente

**Simplify quoting,
speed up production,
improve results.**

goCAD.OSL is the automated rapid quoting software for CNC-machined parts, designed to improve the quoting process in workshops by increasing operational efficiency.

+39 059 765888
Piazza Sergio Finocchi, 3 - Spilamberto (MO)
www.osl.it

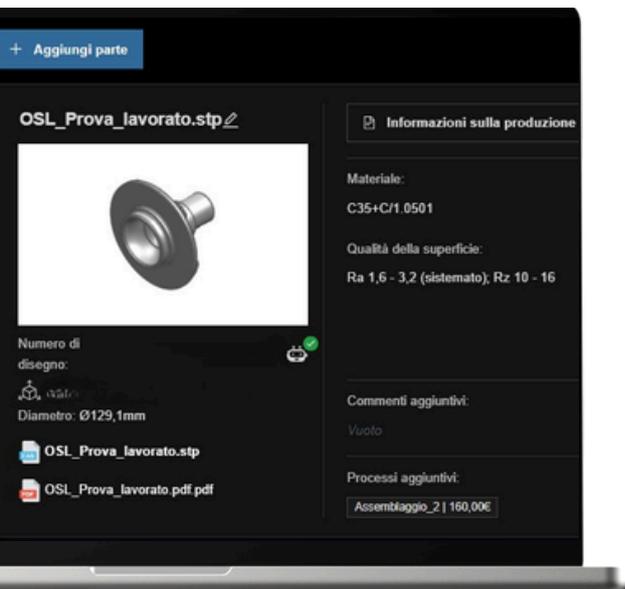

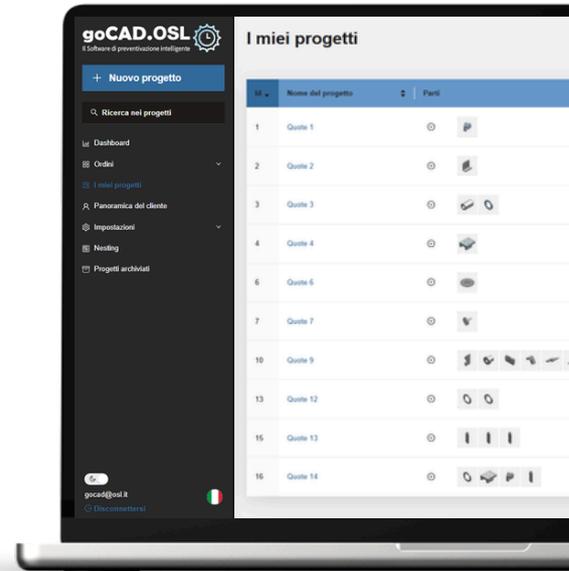

Thanks to an intuitive interface, it allows easy navigation through advanced features and reduces quoting time for small batches.

Key Features

From calculation to production... in just a few seconds!

1. **One-click quoting** – Generate quotes with a single click.
2. **Component data upload** – Quickly upload CAD files, technical drawings, and project data.
3. **Automatic time calculation** – Precise, automated calculation of operational times.
4. **Materials and treatments libraries** – Customizable and versioned cost catalogs.
5. **Drawings and project viewer** – Integrated CAD preview in the browser.
6. **Complete job preparation** – Extract routing, tool lists, raw material, and export to PDF/Excel.
7. **Audit and approvals** – Approval workflow with change tracking.

Machining Processes

goCAD.OSL supports the entire metalworking workflow: cutting, bending, milling, deburring, treatments, assembly, and finishing. Everything is fully integrated to ensure continuity and maximum efficiency.

Why Integrate It / Benefits

- Plan machine time accurately
- Organize production workloads efficiently
- Simplify the work of the purchasing office

Other Benefits / Integrations

- Intuitive interface, even for inexperienced operators
- Fast training and onboarding for staff
- Web/Cloud or On-Premise mode
- Support for CAD formats (STEP, IGES, DXF, PDF)
- Optional integration with the most common ERP systems
